

# Aiptek DZO-V58N Battery Replacement

This guide shows the process of installing the battery.

Written By: Zachary Yun

## INTRODUCTION

The battery is what powers the device when it is not connected to the power cord. The camera does not function without a properly installed and charged battery. Furthermore, lithium-ion batteries like the one found in this device degrade over time. The battery is expected to need replacing after several years of use. Use this guide to replace the battery.

## Step 1 — Battery

- Locate the battery compartment on the back of the camera. It is the panel with the plastic ridges for simple removal.
- Slide the battery compartment cover down off of the camera body.

## Step 2

- Pry up the battery from the bottom using a finger and remove the battery from the case.

To reassemble your device, follow these instructions in reverse order.
